

NutraPro®

Functional Protein Additive

Frequently Asked Questions

What is NutraPro?

NutraPro is a high-quality protein ingredient designed for use in milk replacers. NutraPro delivers protein and amino acid digestibility equal to milk proteins, but with the added benefit of Proteiva™ Functional Proteins.

Will NutraPro change the way my milk replacer looks or mixes?

NutraPro is selected according to stringent quality standards; the aroma, solubility, color and shelf-life of your milk replacer will remain the same.

Will my calves like NutraPro?

Calves consume milk replacers containing NutraPro as readily as all-milk milk replacers.

What are the benefits of using NutraPro in calf milk replacers?

NutraPro is an excellent protein source; in addition, it offers functional proteins to support the calf. Research studies have found that calves fed a milk replacer containing NutraPro function equal to an all-milk milk replacer.

How is NutraPro listed on my milk replacer label?

NutraPro will be listed in the ingredient statement as Spray Dried Animal Plasma as recommended by AAFCO.
